

SCI Connections Presents:

New urinary catheter innovations (indwelling and intermittent) – are improvements on the way ? with Christopher S Elliott, MD., PhD.

Dr. Elliott is the co-chair of the Division of Urology at Santa Clara Valley Medical Center and an affiliated, Associate Professor at Stanford University Medical Center. Dr. Elliott has clinical and surgical expertise in the management of female pelvic organ prolapse, complex urogynecologic anomalies, overactive bladder, BPH, voiding dysfunction secondary to neurologic disease and both male and female incontinence. Dr. Elliott is also currently a member of the Neurogenic Bladder Research Group, a consortium of researchers in North America working to improve the quality of research in the spinal cord injury, multiple sclerosis and spina bifida populations.

This 45 minute presentation, will discuss new urinary catheter innovations (indwelling and intermittent) including, improved bladder drainage during CIC, reduction in medical waste associated with single-use CIC catheters and reduction in SP tube blockages due to encrustation. After the presentation, we will host a 10 minute Q&A segment. Following Q&A segment we will host an hour to network/socialize and dinner will be provided.
