RE: QR Code for Access to Santa Clara County (SCC) Behavioral Health Services Department (BHSD) Provider Directories

DATE: August 26, 2024

Summary

SCC BHSD is excited to announce the launch of a new quick response (QR) code to provide electronic access to both the Mental Health and Substance Use Treatment BHS Provider Directories. This new QR code system allows electronic access to these provider directories with the simple use of a camera phone. This new QR code system will improve efficiencies, minimize unnecessary printing of the directory, and improve the ability of members of the public to access 2 different provider directories electronically in multiple different languages.

The Provider Directory webpage is also being updated monthly to ensure information provided is as accurate as possible. Please ensure that the QR code below is placed in your agency or clinic lobby or public area where the printed version of the Provider Directory was made available to the public in the past. Moving forward, the QR code can minimize the need to print the directory monthly given that the PDF version of the document is several pages long.

Please display the QR code below along with the title.

If you have any questions, email BHSDBusinessOffice@hhs.sccgov.org
