#### Innovation (INN)

The INN component funds projects designed to test time-limited new or changing mental health practices that have not yet been demonstrated as effective. The purpose of the INN component is to infuse new, effective mental health approaches into the mental health system, both for the originating county and throughout California. These projects may focus on increasing access to underserved groups, increasing the quality of services including measurable outcomes, promoting interagency and community collaboration, or increasing access to mental health services. AB 1467, chaptered in June 2012, reinstated the MHSOAC's authority to approve county Innovation plans.
