To aircraft owners at Reid-Hillview, San Martin, and nearby Airports:

Re: *G100UL*[®] Avgas is coming to Reid-Hillview!

There is some exciting news regarding the availability of the *first and only* FAA certified high octane unleaded aviation gasoline!

Santa Clara County has rolled-out GAMI's *G100UL*[®] avgas at KRHV! To celebrate this occasion some special incentives are being offered for a limited time.

As you may already know, *G100UL*[®] high octane avgas has been approved by the FAA for use in all spark-ignition piston engines and airplanes in the FAA type-certificate database. By FAA regulation, certified aircraft may legally use *G100UL* avgas with the associated STCs for the engine and the airframe. GAMI devoted 12 years of intensive engineering and certification effort in order to obtain the fleet wide approval for *G100UL* avgas.

For most aircraft, the *G100UL* STC set (engine and airplane) is priced similarly to the typical cost of a tank of fuel. However, owners of aircraft based at KRHV and E16 who purchase a *G100UL* STC between now and Midnight on November 1st, 2024 will receive a **full refund** of the purchase of that set of STCs. In addition, GAMI will provide the services of an I.A. at KRHV during the day on Saturday, November 2nd, to "sign-off" the required Form 337 at no charge.

In order to receive the free I.A. signoff, aircraft owners will need to appear in person at the *G100UL* rollout event which is scheduled at KRHV on Saturday, November 2nd from 9am to 6pm. Some owners at KRHV and E16 have already purchased the *G100UL* STC. GAMI wishes to express our appreciation to the KRHV and E16 "early adopter" by providing a credit voucher for the purchase of 50 gallons of *G100UL* avgas at KRHV, as an offset to the cost of their earlier purchase of their STCs. The voucher must be used by November 23, 2024.

This incentive is designed to equip as many aircraft on the field at KRHV and E16 as possible with the *G100UL* STCs, and allow you an early opportunity to begin operating your aircraft engine on lead free high octane aviation gasoline.

A) In order to participate in this STC promotion, you need to do the following 3 things:

1. Send an email to KRHV@G100UL.com stating your intention to participate and *approximately* what time on Saturday you would like to be there to have the IA sign off your paperwork, if you plan to take advantage of the IA signoff. Please put your tail number in the subject line!

2. Go to <https://stc.G100UL.com> and purchase the STC for your aircraft. The online STC order form is very straightforward, but if you have any issues, please email cs@G100UL.com for prompt assistance. Your STC and pre-filled FORM 337 paperwork will be emailed to you within minutes. The refund will be processed to your credit card as soon as possible (within a day or two). NOTE: You will need the N number and the engine serial number(s) in order to complete the on-line purchase of the STCs. You can find the engine serial number in the logbooks or on the data plate on the engine.
3. Arrive at KRHV on Saturday November 2nd, 2024, at or around the time you designated in your email. Please bring your printed copies of your downloaded FORM 337 and other paperwork with you. We will supply the Approved Flight Manual Supplement and required aircraft placards when you arrive on Saturday.

You are each encouraged to buy some fuel and see for yourself that it operates no differently than the 100LL you are accustomed to, with the advantages of a cleaner engine, cleaner spark plugs, cleaner air, and reduced engine wear.

- B) In order to participate in the fuel rebate program, for KRHV and E16 based aircraft owners who previously purchased the *G100UL* Avgas STC, please do the following:
1. Send an email to KRHV@G100UL.com, and provide your N number & make and model aircraft. GAMI will then make arrangements to provide you a credit at KRHV for the purchase of 50 gallons of G100UL Avgas, if purchased on or before November 23, 2024.
- C) To further expand this opportunity, the airplane owners of aircraft based at the airports listed below who purchase the *G100UL* Avgas STC by midnight on November 1, 2024 and fly into KRHV November 2nd to purchase G100UL will receive up to 25 gallons of free *G100UL* avgas and a I.A. signoff on the STC paperwork. Be sure to bring the appropriate documentation for signoff.
