

PATIENT DECONTAMINATION SURVEY SHEET FOR TRANSPORT TO HOSPITAL

Patient Name: _____ Date / Time: _____

Patient Age: _____ Patient Gender: _____ Triage Tag#: _____

Incident Address / Location: _____

Circle area that were contaminated on the diagram below:

COMMENTS:

Name of Hazardous Material(s): _____

Hazard Type(s): Chemical: Biological: Radiation:

State of Chemical(s): Liquid: Solid/Powder: Gas/Vapor: Other:

(M)SDS Attached:

Route(s) of Exposure: Inhalation: Ingestion: Skin Contact: Injection: Eye Contact:

Type of Contact(s): Direct: Indirect:

Decontamination Procedures Performed

- Removal of Clothing (Dry Decontamination)
- Deluge Shower (Wet/Gross Decontamination)
- Eye Wash
- Local Decontamination of Affected Area Only
- Other: _____

Duration of Decontamination _____

Special Concerns regarding the Hazardous Materials Involved: _____

Fire Agency Rep: _____ Phone: _____

Patient Handover, Treatment, and Transport

A. Once patients have been deemed properly decontaminated by the IC (or their designee), the patients will be moved to a safe area within the “Cold” Zone for medical treatment by the emergency medical responders.

B. The IC, or their designee and the transporting paramedic must both agree that the patient is properly decontaminated and ready for treatment and transport, before treating the patient or loading the patient inside the ambulance. IC designees may include the HAZMAT Group Supervisor, Safety Officer, or Decontamination Team Leader.

C. Hospital Radio Reports

- State “DECON ALERT”

- Identify that the patient being transported has been decontaminated after being exposed to a contaminant.

- Identify the following:
 - a. Chemical name
 - b. Decontamination methods used on-scene
 - c. Any appropriate treatment information/considerations
 - d. Provide routine patient notification report
 - e. Request that the ED have an appropriate representative meet the ambulance outside the ED door to evaluate the patient before entry.
 - f. Ambulance personnel shall not enter the emergency department with the decontaminated patient until authorized by the appropriate emergency department representative

- The hospital representative shall meet the ambulance crew outside the hospital emergency department doors and determine whether to:
 - a. Take the patient into the emergency department: or,
 - b. Direct hospital personnel to decontaminate the patient.
