

2023

**SANTA CLARA COUNTY
LAW ENFORCEMENT AGENCIES
ANNUAL CRIME STATISTICS**

EXECUTIVE SUMMARY

The following report is an overview of crime statistics in Santa Clara County in 2022. The included crime, population, employment, and arrest data are provided by the individual law enforcement agencies annually to the District Attorney's Office Crime Strategies Unit for analysis.

In response to Federal and State mandated reporting standards for crime data, law enforcement agencies are in various stages of transition to the National Incident-Based Reporting System (NIBRS) and California Incident Based Reporting System (CIBRS). This means that law enforcement agencies will phase out use of the Summary Reporting System (SRS) of data reporting to the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) program. The SRS system used a hierarchy rule to limit crime data collection for an incident to the most egregious offense only. NIBRS/CIBRS reporting differs from UCR reporting in that it allows data capture of multiple offenses for an incident, making it a more comprehensive data collection system. During the transition to NIBRS/CIBRS, crime statistics reported by law enforcement agencies may initially appear to result in increases, however, more accurately it is establishing a new baseline.

The following agencies shared data that was the traditional **UCR-SRS** reporting for the entire year 2022:

- Campbell Police Department
- Santa Clara County Sheriff's Office (SCCSO)
- Santa Clara Police Department
- San Jose Police Department

The following agencies shared data that was **NIBRS/CIBRS** for the entire year 2022:

- Los Altos Police Department
- Los Gatos-Monte Sereno Police Department
- Morgan Hill Police Department
- Mountain View Police Department
- Sunnyvale Department of Public Safety

The following agencies shared data that was a combination of traditional **UCR-SRS and NIBRS/CIBRS** for the year 2022:

- Gilroy Police Department (transition to NIBRS made 9/1/2022)
- Milpitas Police Department (transition to NIBRS made 10/1/2022)

2022 REPORTED CRIME TOTALS

Previous reports provided an aggregate count of Aggravated Assault and Simple Assault into a single offense category of Assault. Under NIBRS, the definition of Assault Offenses is inclusive of: Aggravated Assault, Simple Assault, and Intimidation. For the 2022 crime data, we are continuing to report out solely on Aggravated Assault and Simple Assault but reporting the data separately. Crime definitions can be found at the end of this report.

* The crime rate provides a measure of the severity of a crime problem within a given jurisdiction. The crime rate is based on the number of crimes reported for each 100,000 population. The rate is calculated by multiplying the crime totals by 100,000. That number is then divided by the population of the service jurisdiction.

* Please note that the calculation is an estimate assuming that if a report results in an arrest it involves a single individual. There are instances where multiple individuals may be arrested in association with a single report, or no individuals are arrested. If that has occurred, the estimates are potentially higher than the actual number of reports involving an arrest.

SANTA CLARA COUNTY CRIME TRENDS - 2013 to 2022

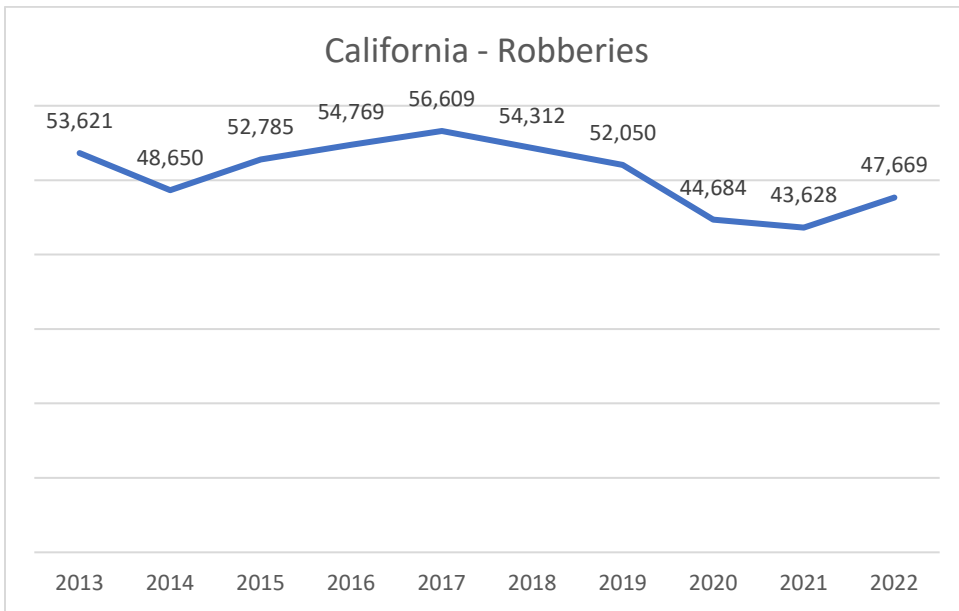

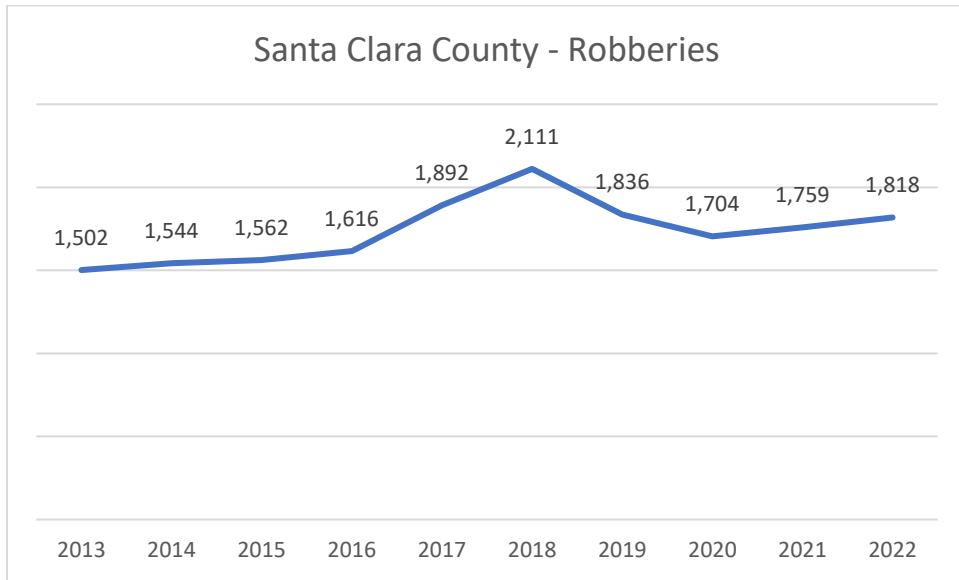

The following charts display overall reported crimes in Santa Clara County and California, as reported to California's Department of Justice, and available through the OpenJustice portal.¹ This website contains data, mandated by the state, from all of Santa Clara County's reporting law enforcement agencies. All jurisdictions report combined "Violent Crimes", defined as a total of all reported Rapes, Robberies, Homicides and Aggravated Assaults. In addition, data is collected on "Property Crimes", which is a combined total of all reported Burglaries, Motor Vehicle Thefts, Larcenies and Arsons. These crimes are further defined below. The numbers reflected in the charts are the number of reported incidents. In this context, the numbers do not reflect the number of suspects, or number of filed criminal cases. Many of the crimes may remain unsolved, but were nonetheless reported to law enforcement during the reporting time frame.

Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by

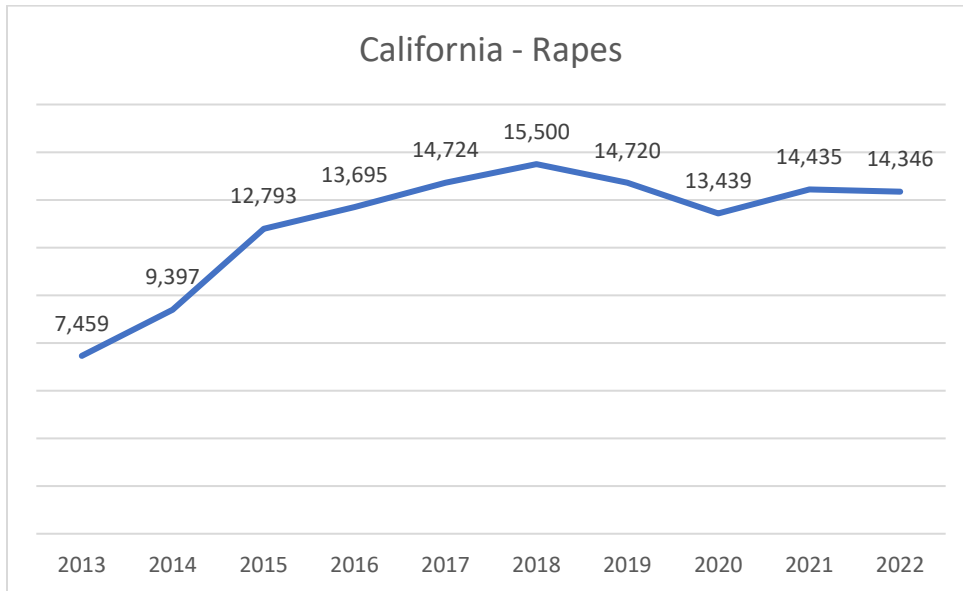

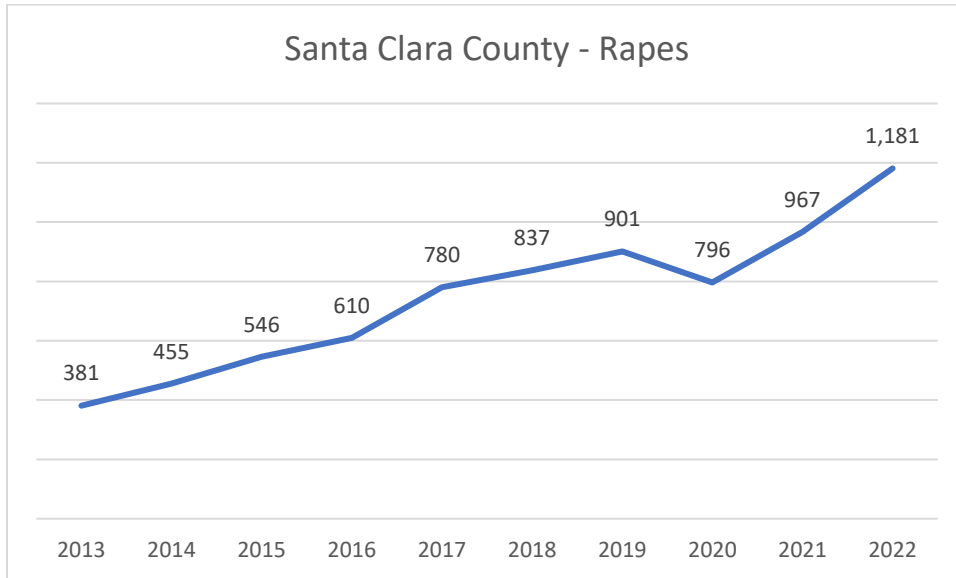

¹ Found at www.openjustice.ca.gov

force or threat of force or violence and/or by putting the victim in fear.

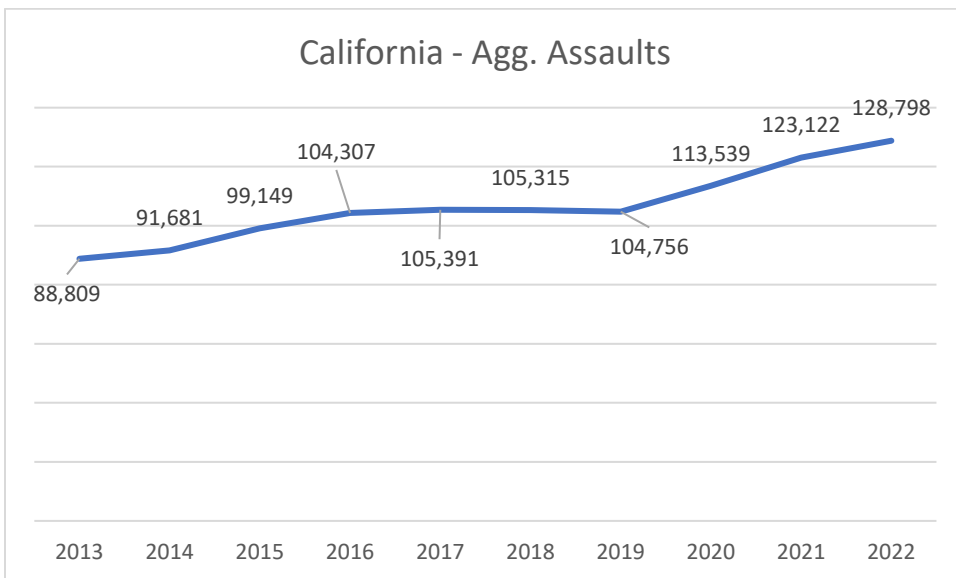

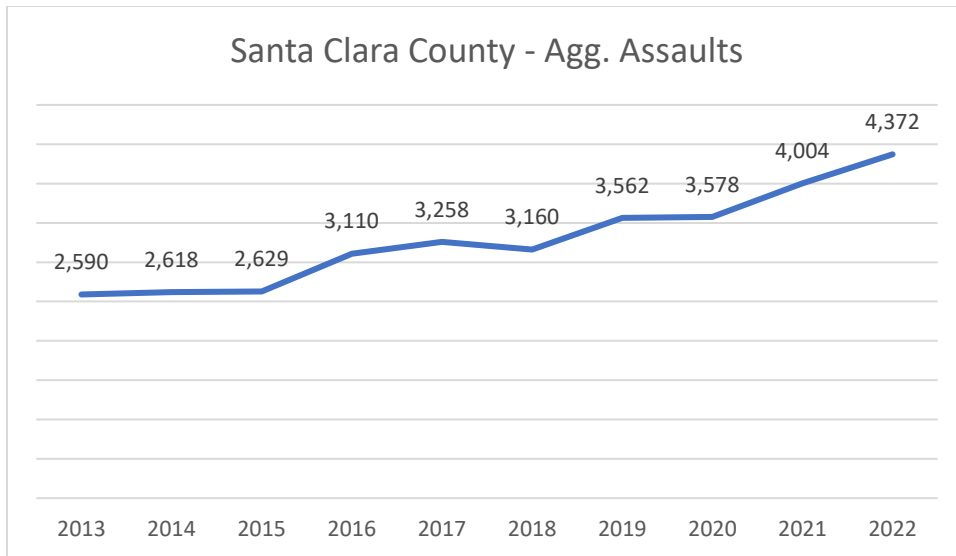

Rape - The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. This includes crimes against child victims.

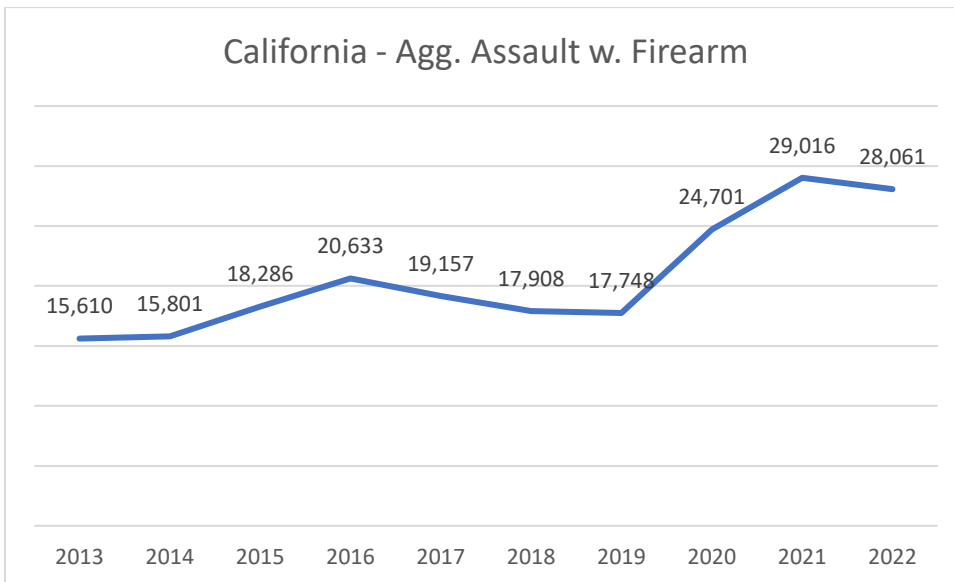

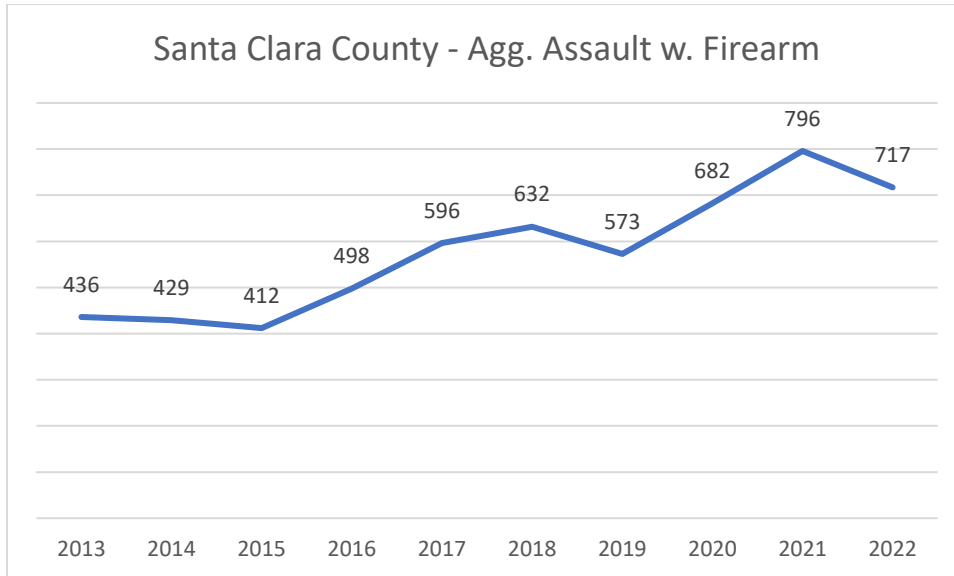

It is important to note that the prolonged increase in reported rapes across California in the last ten years mirrors national trends. There are many factors that may play a role in this increase, including efforts to encourage reporting these traditionally-unreported sexual crimes to law enforcement.

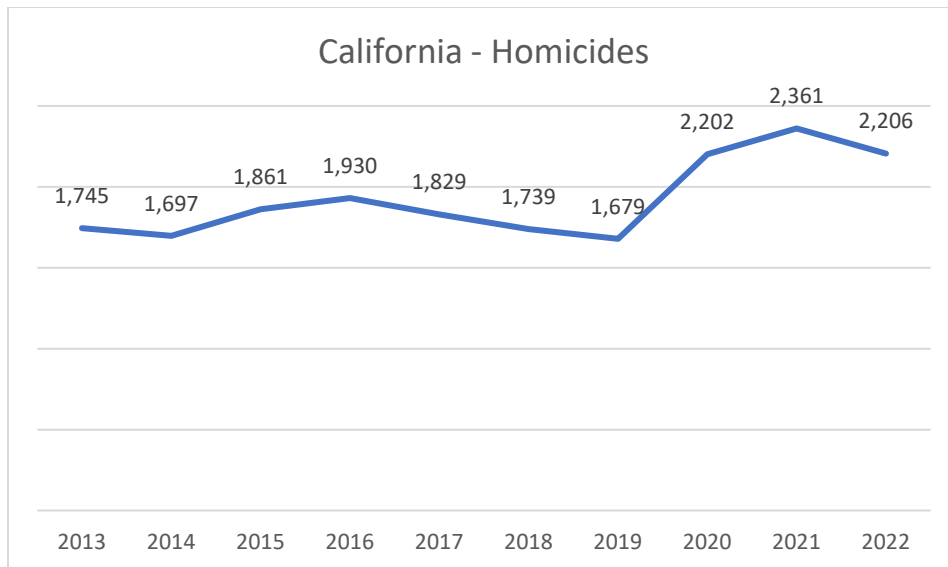

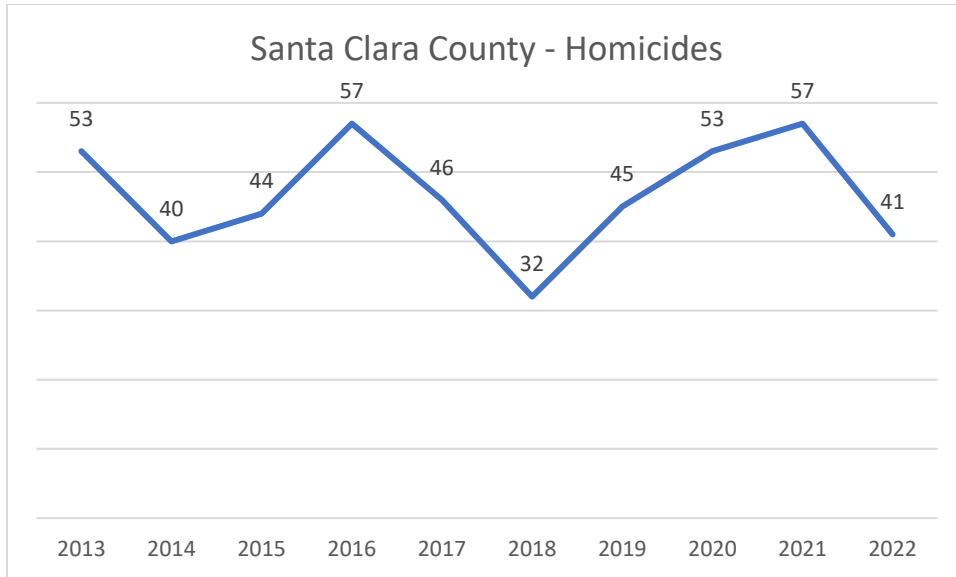

Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. This category includes serious incidents of domestic violence, shootings, and stabbings.

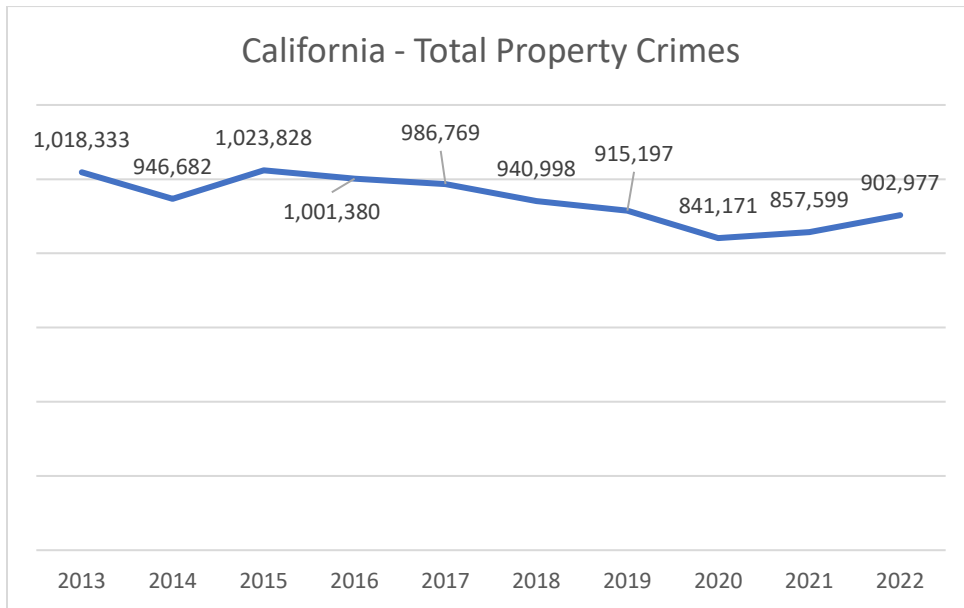

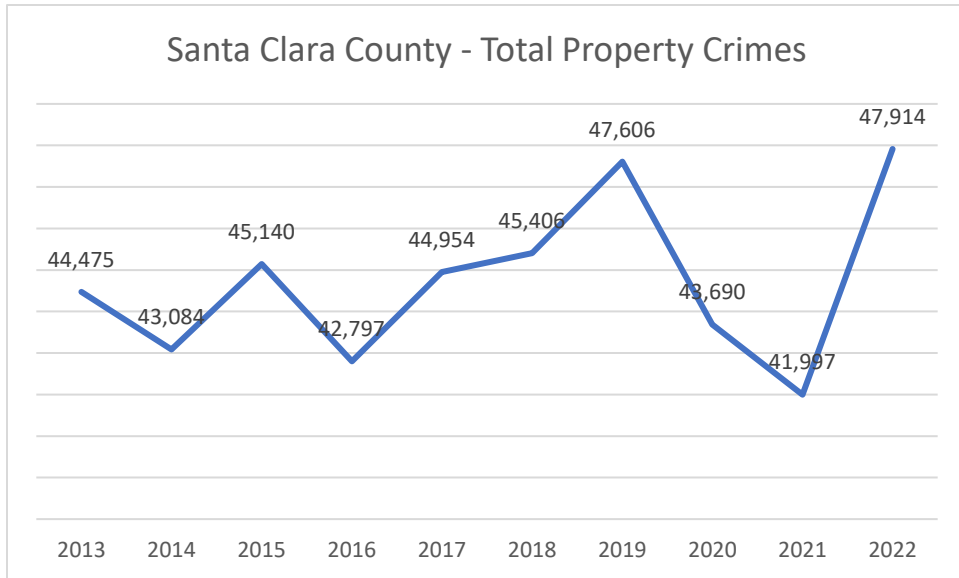

Aggravated Assault with a Firearm - this subset of aggravated assaults means that a firearm was either used to shoot at a victim, or was used to assault the victim (hitting them with a firearm, pointing firearm in an assaultive way).

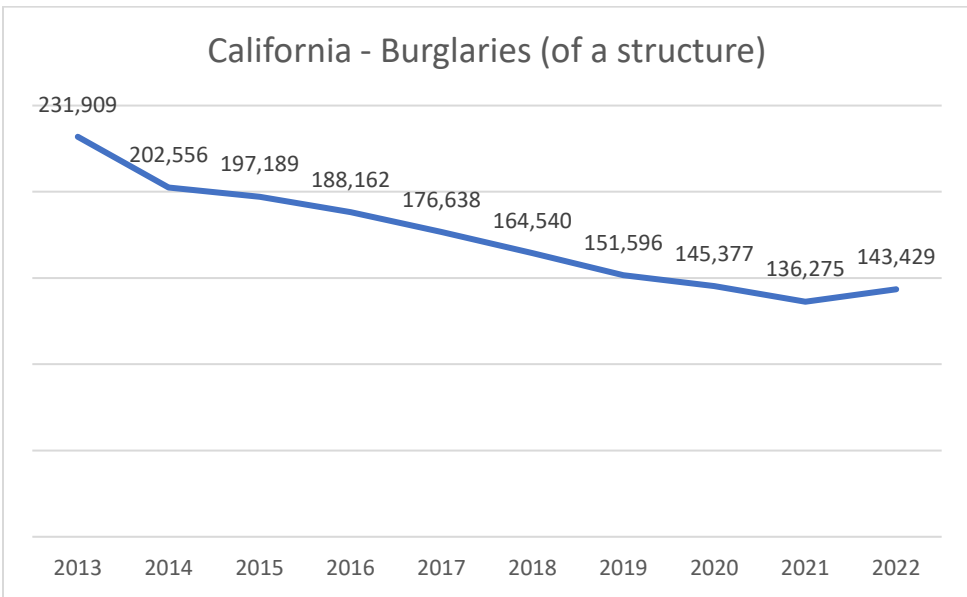

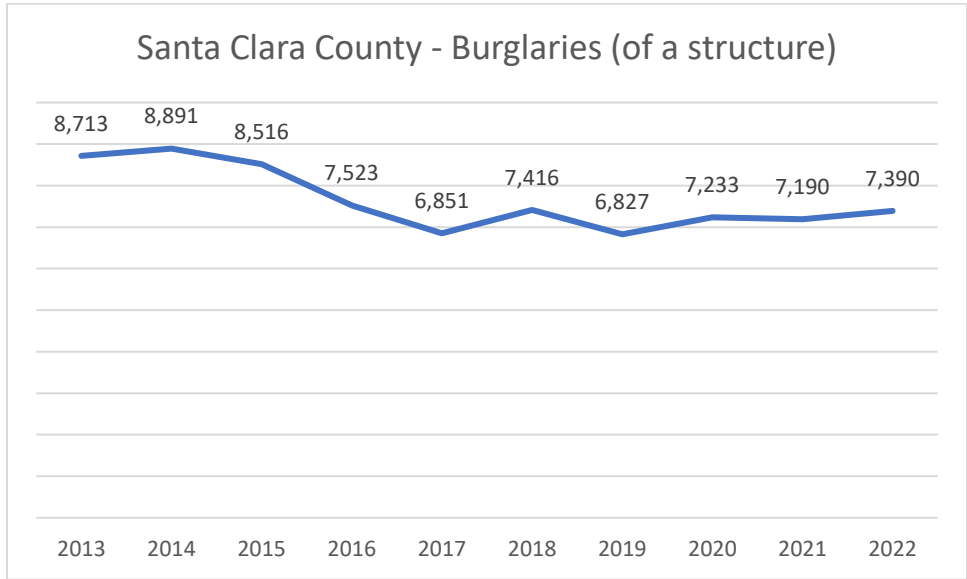

Criminal Homicide - a.) Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. b.) Manslaughter by negligence: the killing of another person through gross negligence. Deaths of persons due to their own negligence, accidental deaths not resulting from gross negligence, and traffic fatalities are not included in the category manslaughter by negligence.

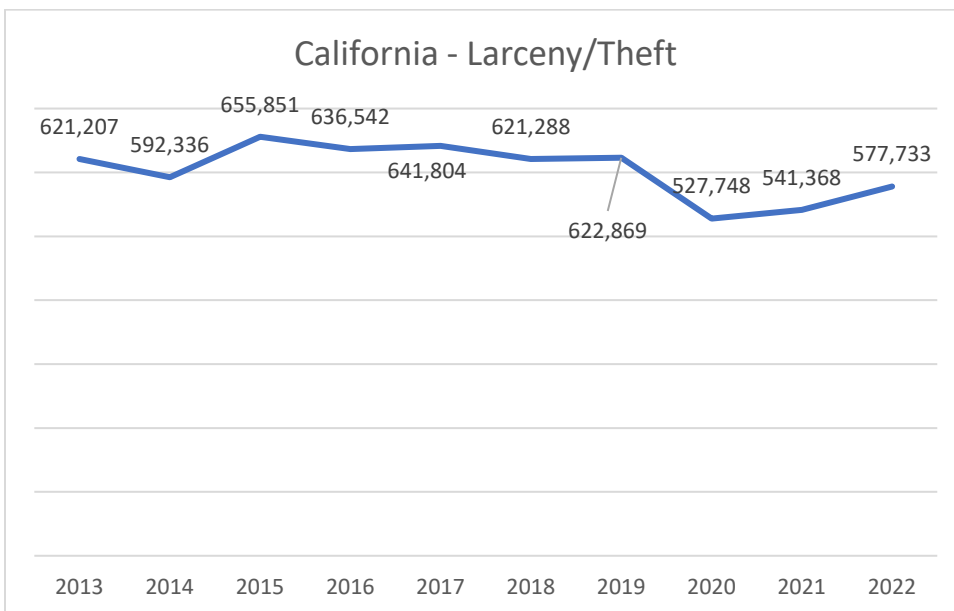

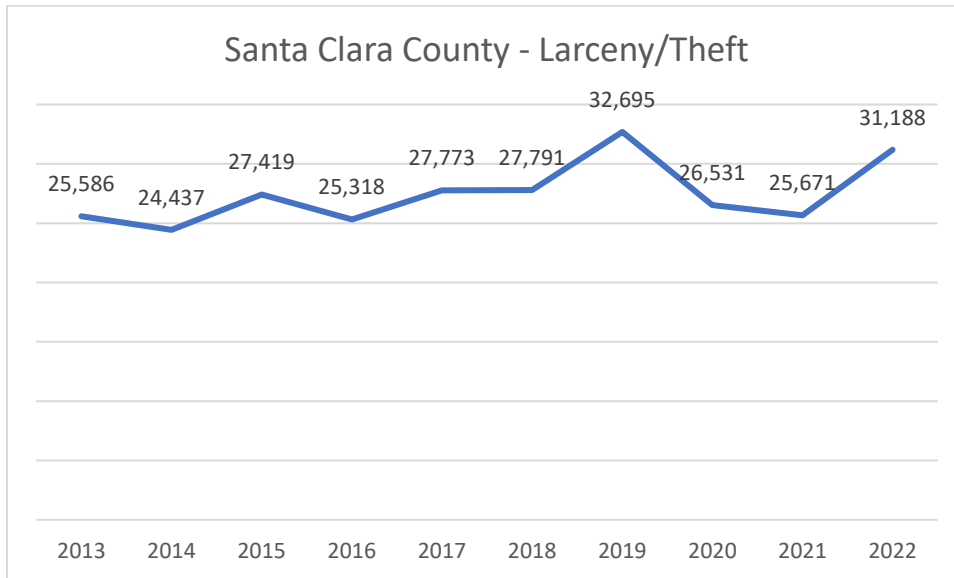

Property Crimes - For California and FBI Uniform Crime Reporting, the category "Property Crimes" includes all reported burglaries, larcenies, motor vehicle theft and arson. Those categories are further defined below.

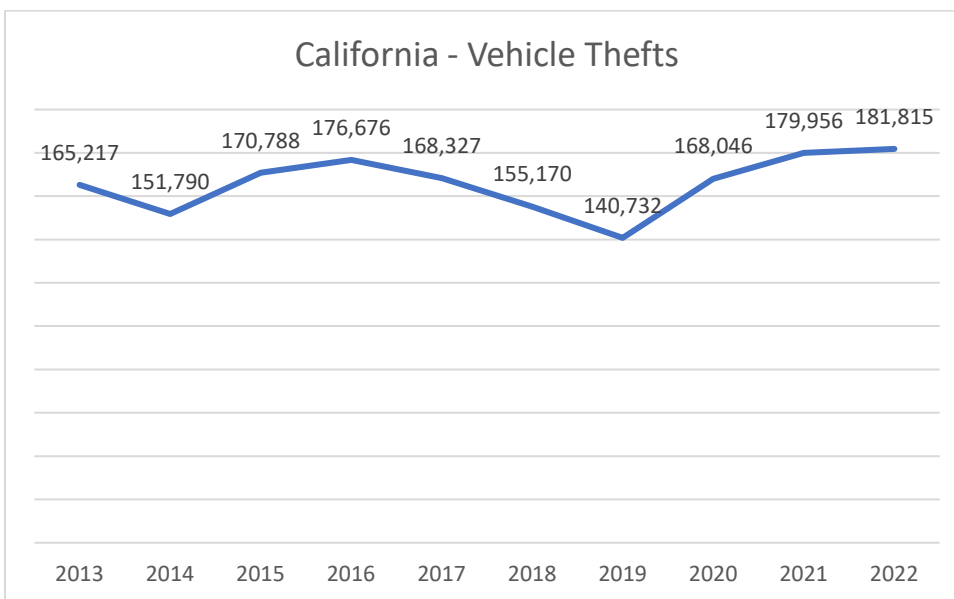

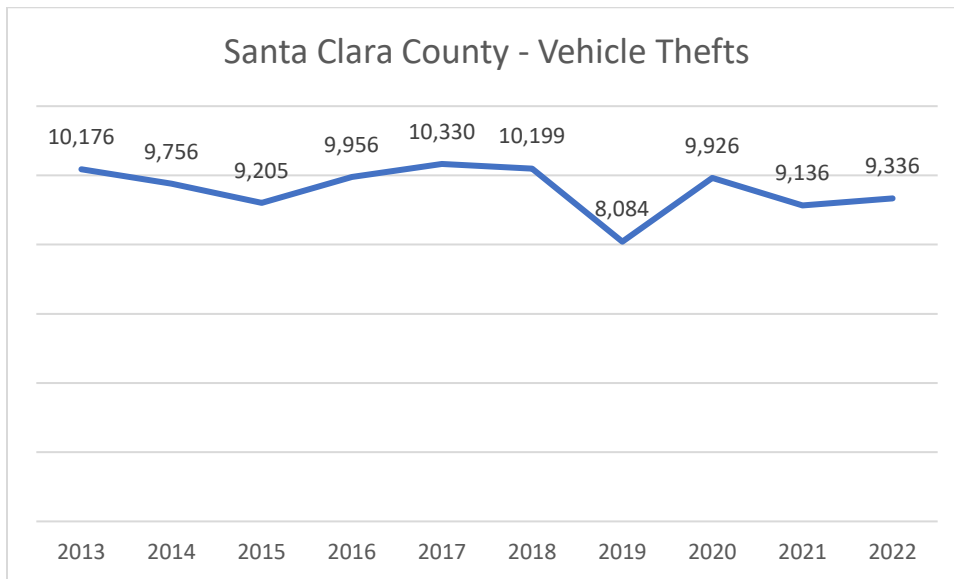

Burglary (breaking/entering) - Unlawful entry of a structure to commit a felony or theft. Attempted forcible entry is included. This category DOES NOT include burglary of a vehicle. Vehicle break ins are considered "larceny" for this purpose.

Larceny/Theft (except motor vehicle theft) - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

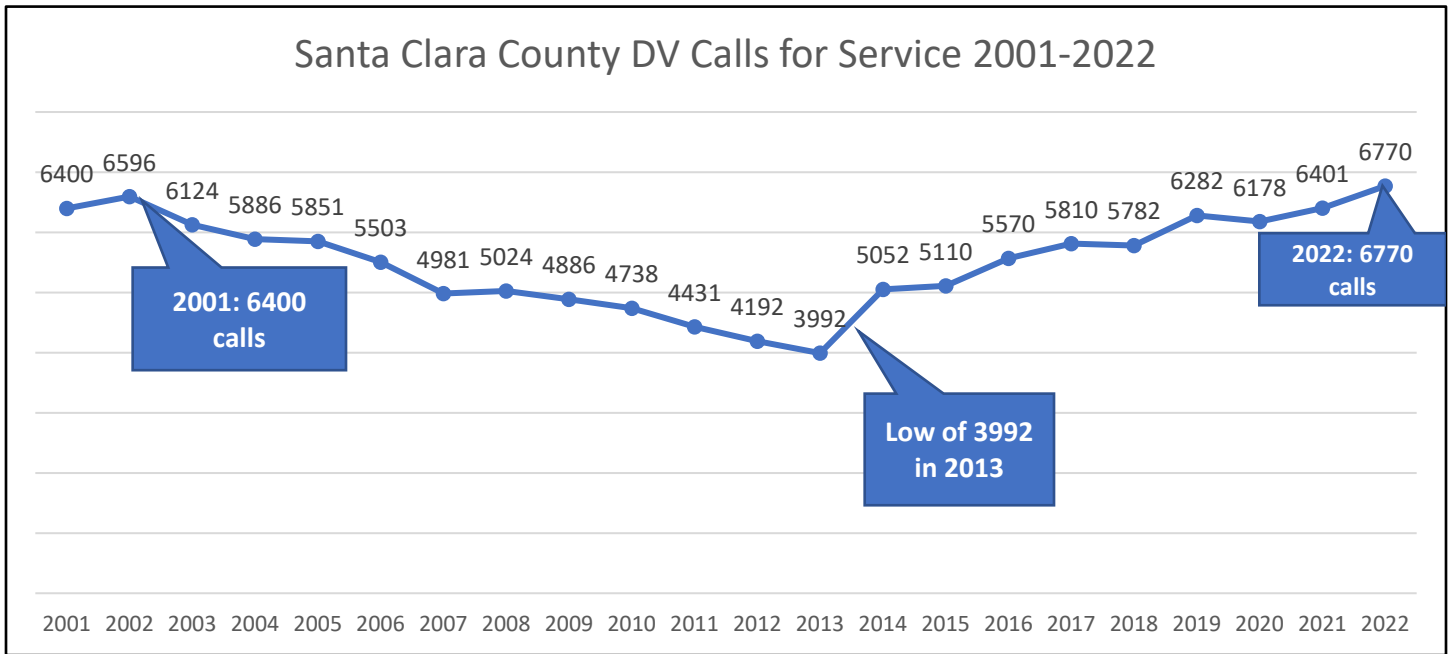

Motor Vehicle Theft - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

DOMESTIC VIOLENCE CALLS FOR SERVICE

California Department of Justice also tracks data regarding domestic violence “calls for service”. This term means individual calls to police agencies where the underlying offense is domestic violence. In California, overall calls have significantly declined over the last 20 years. Santa Clara County calls also declined, but then trended upward. The high water mark for these calls was reached in 2022, when 6770 calls were made. Between 2001 and 2022 there was an overall 5% increase in calls, but in the last ten years, there was a 70% increase.

Statewide, domestic violence calls have significantly declined over 20 years. From 2001 to 2022 there was an 18% decrease. In the last ten years there was a 7% increase (2013 to 2022).
