Serious Eye Damage/Irritation: Not an eye irritant.

Skin Sensitization: Skin sensitizer

STOT – Single exposure No data is available to indicate product or any components present at greater than 0.1% present a specific target organ toxicity hazard from single exposure.

#### Chronic Toxicity/Effects

Germ Cell Mutagenicity This product has not been tested. No data is available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Carcinogenicity: This product does not contain any carcinogens as listed by OSHA, IARC, or NTP.

Slightly elevated incidences of benign tumors of the thyroid and liver were seen in rats following lifetime administration of Pyrethrins. Further detailed scientific studies into the mode of action responsible for these effects show that: (1) because of biological species differences, the rat thyroid tumors are not relevant to humans, and (2) the rat liver tumors occur in animals only at doses greatly exceeding human exposure levels and that cause cell proliferation (mitogenesis). Based on these data, the US EPA has classified Pyrethrins as "Not Likely to be Carcinogenic to Humans" at doses that do not cause a mitogenic response in the liver/cell proliferation. Thus, Pyrethrins can be considered to be noncarcinogenic at exposure levels relevant to human use of Pyrethrins-containing products.

Reproductive Effects: No data is available to indicate product or any components present at greater than 0.1% cause reproductive or teratogenic toxicity.

STOT – Repeated Exposure: No data available

Additional Information: None
