I urge you to consolidate the County Airports to San Martin and  
use Reid Hillview for alternative uses that benefit our community more  
at this time. Poor and minority folks in our County are being detrimentally affected  
by RTV; conditions have changed and the County must acknowledge that the time

has come to close RTV. pilots and students can be accommodated at San Martin.

This issue can be framed in many ways. One way to see this issue is in terms of the privileged (and who have the means and time to be here today) and the underprivileged (who cannot be here because they have to go to work). The privileged can use the

*over*

instruments of democracy to promote their interests, whereas those who are working are being denied democracy to promote their interests.

In other words, the ones who do not live in the Reid Hill community ~~can~~ use the absence of the Reid-Hill view residents to squash their rights to promote their interest, ~~that~~ to ~~shut~~ close Reid Hill view airport.

---

I don't think that's the American way to make decisions.

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Raymond Geja

# ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

# IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

# ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Araceli Rodriguez

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Sophia Smith

Address: 11260 Canon Vista Ave 95127 San Jose

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

# IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: LUIS GOMEZ

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Lucky Burrow

# ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

# ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Hien Huynh

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

Name: Alondra Sanchez

Address: 2730 Twin Oaks Ln.

Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded jet fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

San Jose, CA 95122

July 15, 2018

United States Environmental Protection Agency  
75 Hawthorne Street  
San Francisco, CA 94105-3901

Gentlemen:

For the last several years we have lived in this neighborhood under the direct flight path of airplanes from Reid Hillveiw Airport.

This is a small airport used primarily for recreational purposes and for student flight training. I believe the lease for this airport will be due in three years time.

We believe our health has been greatly affected and would like to request an environmental study done to ensure the health and safety of ourselves, our elders and our children. We would like this study as we would not like to see any more of our neighbors with more multiple health issues.

Thank you in advance for any support you may give us regarding this issue.

Sincerely,

Maria Reyes,  
Cassell Neighborhood Association

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded jet fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded jet fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,

Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded jet fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## IT IS TIME TO CLOSE REID-HILLVIEW AIRPORT

**Dear Board of Supervisors of Santa Clara County,**

Reid Hillview Airport was originally built in 1939 in a rural area. It is now surrounded by residential neighborhoods that are detrimentally affected by the Airport. Most of these neighborhoods are low-income.

The small privately-owned planes served by Reid Hillview are primarily used for recreational purposes and student flights, which continually circle over local homes. Planes are constantly buzzing overhead, children are endangered by soil and air pollution from the leaded jet fuel used by the planes, and people live in real fear that another plane will crash into their homes, as has occurred numerous times. Private plane owners and flight students could use the nearby San Martin Airport to park and fly their planes without great inconvenience.

The number of planes at Reid Hillview Airport has declined in recent decades, even as Silicon Valley has grown. Conditions have changed. It's time to look at alternative uses for the 180 acres now occupied by Reid Hillview.

Please consider closing Reid Hillview Airport.

Thank you,

## ES TIEMPO DE CERRAR EL AEROPUERTO REID-HILLVIEW

**Estimada Mesa Directiva de Supervisores del Condado de Santa Clara,**

El Aeropuerto Reid Hillview se construyó originalmente en 1939 en un área rural. Hoy en día está rodeado de vecindarios residenciales afectados perjudicialmente por el Aeropuerto. La mayoría de estos vecindarios son de bajos ingresos.

Los pequeños aviones privados servidos por Reid Hillview se usan principalmente para propósitos recreativos y vuelos por estudiantes, que circulan continuamente arriba de los hogares locales. Los aviones zumban constantemente por arriba de ellos, los niños están en peligro de la contaminación de la tierra y del aire debido al combustible con plomo que usan los aviones, y las personas viven con el miedo real que otro avión chocará contra sus casas, como ha ocurrido en varias ocasiones. Los dueños de los aviones privados y los estudiantes de vuelo pueden usar el Aeropuerto cercano de San Martín para estacionar y volar sus aviones sin gran inconveniencia.

El número de aviones en el Aeropuerto de Reid Hillview ha disminuido en las últimas décadas, a pesar del crecimiento de Silicon Valley. Las condiciones han cambiado. Es tiempo de considerar usos alternativos para los 180 acres que actualmente ocupan Reid Hillview.

Por favor consideren cerrar el Aeropuerto Reid Hillview.

Gracias,
